From lunch wagon to nostalgic tradition

When Walter Scott quit his printing job in 1872 to sell food at night from a horse-drawn covered express wagon in Providence, Rhode Island, little did he know that he had just launched a winning concept that was soon to become a familiar part of the American landscape: the Diner.

Over the years, diners moved from wagons to cars and eventually to more permanent venues. They become more attractive and more comfortable. And while the look changed, the focus on home-style cooking never did.

Today, the American diner with its popular 60's vibes still stands for smiles and satisfaction, and the traditional taste of bygone times.

Burgers

Sizzling, juicy burgers in many variations that give this classic favourite an exciting twist. All burgers are made from fresh prime Angus beef
